

ESLAM ABBAS

IT System Engineer

Cairo, Egypt | eslam.abbas.jobs@gmail.com | 01004802080 | linkedin.com/in/eslam-abbas-45b952209

PROFESSIONAL SUMMARY

IT System Engineer with 5+ years of experience managing enterprise IT infrastructure, including Windows Server environments, network systems, and virtualization platforms (VMware ESXi). Experienced in Active Directory administration, FortiGate firewall and site-to-site VPN configuration, and performance monitoring (PRTG) to keep systems available. Comfortable noticing operational inefficiencies and building practical solutions for them, including a fingerprint management platform, an IT asset & ticketing system, and infrastructure automation tools used across multiple branches. Combines hands-on technical support with an automation-first mindset focused on continuously improving IT service delivery.

PROFESSIONAL EXPERIENCE

IT System Engineer — IMTENAN Group

Jan 2026 – Present

- Manage and maintain servers and virtual environments (VMware ESXi); administer Windows Server services (Active Directory, DNS, DHCP).
- Monitor system and network performance using PRTG to ensure high availability and proactive issue detection.
- Manage user accounts, permissions, and group policies; resolve incidents through ITSM/Helpdesk ticketing systems.
- Provide technical support for end-users (hardware & software troubleshooting) and perform regular system backups to ensure data integrity.
- Configure and manage FortiGate firewalls, including site-to-site VPN setup for secure branch connectivity.
- Moved Windows installation from USB sticks and manual program installs to network deployment, first with WDS and then MDT, using captured images that already include the standard programs.
- Set up MeshCentral for remote access to company devices, using Group Policy to deploy the agent automatically.
- Set up a central print server using PaperCut.

Key Projects — Internal Tools Built to Automate IT Operations

- **Fingerprint Device Sync Platform:** built a Flask-based system to manage ZKTeco fingerprint devices across all branches from a single dashboard, including remote fingerprint-template transfer between devices, removing the need for on-site enrollment visits to every branch.
- **IT Assets & Ticketing Tracker:** developed an internal asset and ticketing system with automatic email-to-ticket classification, Active Directory user sync, Snipe-IT integration (hardware, licenses, accessories), and per-user admin audit logging.
- **DVR/NVR Time Sync Tool:** built a tool using the Hikvision ISAPI to test connectivity and synchronize the clock across all DVR/NVR units in one action, replacing manual per-device configuration.
- **Hardware Health & Inventory Automation:** wrote a PowerShell script that remotely scans every domain-joined machine for disk health (SMART data), RAM specs, and Active Directory OU inventory, giving the team data for hardware replacement decisions.

IT System & Network Engineer — Fathallah Beit El Gomla

Mar 2022 – Jan 2026

- Maintained IT infrastructure and reliable network connectivity across 10+ branches and central administration.
- Troubleshoot 200+ hardware, software, and network issues annually, reducing resolution time and improving system uptime.
- Provided senior-level IT support and end-user training, resolving 150+ technical support tickets monthly.
- Configured and monitored IP-based surveillance systems (IP cameras, CCTV), integrating them with existing network infrastructure.

IT Specialist — Carrefour Egypt

Mar 2021 – Mar 2022

- Provided on-site IT support for store operations, including POS systems, network connectivity, and end-user hardware/software issues.
- Maintained store IT infrastructure and coordinated with central IT to minimize disruption to daily retail operations.

IT Support — Military Service, Egyptian Armed Forces

Feb 2020 – Mar 2021

- Provided IT support within a structured environment for 100+ end-users.
- Maintained hardware/software systems and reduced downtime through preventive maintenance.

EDUCATION

Bachelor of Computer Science — Higher Technological Institute (HTI), 10th of Ramadan, Egypt — 2019

CERTIFICATIONS & COURSES

- Cisco Certified Network Associate (CCNA) | Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+ | CompTIA Network+ | VMware vSphere | VMware Horizon (currently studying)
- Python Web Development | HTML, CSS, JavaScript | Microsoft Office Suite

SKILLS

- **Systems:** Windows Server (Active Directory, DNS, DHCP, Group Policy), VMware vSphere/ESXi, WDS, MDT, MeshCentral, PaperCut
- **Network & Security:** FortiGate firewalls, site-to-site VPN, managed switches, leased lines, IP cameras/CCTV
- **Monitoring & Support:** PRTG, ITSM/Helpdesk ticketing, Snipe-IT
- **Scripting & Automation:** Python (Flask, REST APIs), PowerShell (remote CIM/WMI automation)
- **Soft skills:** problem-solving, communication and teamwork, adaptability and continuous learning
